

Adewole Oluwajuwon Isaiah

Frontend Developer | React Engineer

 adewoleoluwajuwon@gmail.com | 09126273600, 08130788513 |  Lagos, Nigeria

Profile

Frontend Developer with a strong focus on building dynamic, responsive, and user-friendly web interfaces using React, JavaScript, and modern UI libraries. Skilled in transforming design mockups into pixel-perfect applications with high performance and accessibility standards. Adept at working across the full stack when needed, collaborating with backend teams, and ensuring seamless API integration. Passionate about creating elegant, maintainable, and scalable frontend architectures that enhance user experience and business outcomes.

Key Skills

- Frontend: React, JavaScript, HTML5, CSS3, Tailwind CSS, Flowbite, REST API Integration
- State Management: Context API, React Hooks
- Version Control & Tools: Git, GitHub, Postman
- Backend Collaboration: Java (Spring Boot), Node.js (API Integration)
- Database Understanding: MySQL, SQL Server
- Others: Responsive Design, UI Optimization, Cross-Browser Compatibility

Professional Experience

Technofunctional SAP Consultant – International Data Management Services (IDM) (2023 – Present)

- Currently working with React and SAP Business One to develop internal dashboards and custom UI tools that visualize SAP data for end-users.
- Collaborate with backend teams to design full-stack features integrating SAP workflows with modern web interfaces.
- Support optimization of system performance, data visibility, and automation within enterprise environments.
- Contribute to cross-functional projects merging SAP functionality with custom frontend components for improved user experience.

Frontend Developer – Daltha Technologies (2022 – 2023)

- Built and maintained responsive React applications for enterprise and SME clients.
- Collaborated closely with UX/UI teams to deliver user-friendly and accessible designs.
- Integrated REST APIs for dynamic data rendering and improved performance.
- Optimized components for reusability, scalability, and fast load times.
- Worked with Git and Agile workflows to ensure efficient project delivery.

SAP B1 Personnel – FedEx Express Delivery (2018 – 2022)

- Supported SAP Business One modules and system customization.
- Collaborated with technical teams to streamline data reporting and UI forms.
- Enhanced data accuracy and reporting through front-end visualization improvements.

Projects

SyncPOS Web Dashboard (React, REST API Integration)

Developed a modern POS dashboard UI using React and Tailwind. Integrated APIs for real-time inventory, transactions, and analytics display.

Asset Management System (Thymeleaf + Spring Boot)

Developed responsive React UI for asset tracking, integrated with REST APIs from a Java backend. Implemented authentication, tables, and search filters.

Secure QR Code Generator (React + Node.js + .NET API)

Designed frontend for dynamic QR generation and verification interface, consuming secure APIs.

Education

B.Ed, Pedagogy – Ekiti State University
